

FLORA TIGRESSE

Flora Tigresse, the icon of our collection, is a fearless Earth Warrior, the Goddess of Flora and Fauna, the plant and animal kingdom. In praise of her unwavering engagement to defend the ecosystem, our Flora Tigresse collection is featuring three hand painted prints: Flora and Fauna, Power Animal, and Flower Tiger, each presenting a special message to aid sustainability.

Flora and Fauna celebrates the primordial symbiosis of nature asserting its presence with eye-catching styles created responsibly. The collection combines upscale loungewear with timeless silk designs, made of our exclusive hand painted leopard and daisy prints, in our Paris atelier.

The innate femininity represented in tigers is reflected through the characteristic Flower Tiger illustration. The Power Animal graphics, a triptych of red-white-blue zebra stripes adorned with blooming peonies, highlights the empowerment gained through a harmonious relationship with all majestic animals.

The collection pays homage to fierce femininity while remembering the significance of our environment and the powerful animals who call it home. The designs reflect the importance of their protection and preservation in the hopes that we can adapt their courage during these challenging times.
